

LubeMax premium Vacuum Pump Oil

PRODUCT DESCRIPTION

LubeMax Premium Vacuum Pump Oil is a unique, proprietary blend of highly refined base oils. These base oils provide a more viscous and stable formulation which is ideal for all vacuum pumps. Because the quality of your vacuum pump performance is directly related to the quality of vacuum pump oil used, use only an oil that is proven to be optimum for use in demanding evacuation applications. For best results, change vacuum pump oil after each evacuation.

APPLICATION OF PRODUCT

The oil is especially formulated for use in vacuum pumps where it will tolerate exposure to very high vacuums with low levels of evaporation. LubeMax Premium high Vacuum Pump Oil resists the formation of deposits and maintains its original lubricating properties over a long life. It is a dehydrated oil; therefore, keep containers well sealed to prevent contamination by moisture.

It is also suitable for use in pump bearings and sealing glands.
