

LAMORA HLP 32, 46, 68

Hydraulic oils acc. to DIN 51524 part 2

Your benefits at a glance

- HLP hydraulic oils acc. to DIN 51524, part 2
- Good wear protection
- Service temperature range from -12°C to 120°C

Your requirements - our solution

LAMORA HLP are hydraulic oils based on mineral oils. They comply with the HLP requirements of DIN 51 524, part 2 and reduce friction and wear.

Application

LAMORA HLP have been designed for use as hydraulic oils.

Application notes

LAMORA HLP oils are miscible with mineral oil-based hydraulic fluids. However, it should be taken into consideration that mixing LAMORA HLP oils with residual quantities of the previous oil fill might reduce their performance. We therefore recommend cleaning the oil circuit thoroughly before applying LAMORA HLP oils for the first time.

The data in this document is based on our general experience and knowledge at the time of publication and is intended to give information of possible applications to a reader with technical experience. It constitutes neither an assurance of product properties nor does it release the user from the obligation of performing preliminary field tests with the product selected for a specific application. All data are guide values which depend on the lubricant's composition, the intended use and the application method. The technical values of lubricants change depending on the mechanical, dynamical, chemical and thermal loads, time and pressure. These changes may affect the function of a component. We recommend contacting us to discuss your specific application. If possible we will be pleased to provide a sample for testing on request. Klüber products are continually improved. Therefore, Klüber Lubrication reserves the right to change all the technical data in this document at any time without notice.
